

The future of payments

Are you tired of high transaction fees and inflation eating into your profits? Developed in response to the financial crisis in 2008, Bitcoin is a sound and permissionless money protocol accessible to everyone in the world. Values are measured in bitcoin or the smaller unit “Sats”.

Global transactions are added to the Bitcoin Blockchain every 10 minutes. Rest assured that transactions from and to your store are settled and processed without a middleman, transparent and final.

	 Bitcoin Network	 Corporate Networks	 Card Networks	
Low fees with no minimums	✓	✗	✗	✓
Instant settlement	✓	✗	✗	✓
Accept payments on your phone	✓	✓	✓	✗
Chargeback-free	✓	✗	✗	✓
Fraud-free	✓	✗	✗	✗

The Lightning Network

While Bitcoin onchain payments are well-suited for storing value, they are not the most efficient option for standard micro-transactions. This is where Lightning Network (LN) comes in.

By using decentralized channels opened by node runners globally, LN enables instant settlement of payments with minimal fees.

With LN, merchants can interact globally without any waiting periods or fraud issues associated with traditional payment methods.

What is LNbits

LNbits is a free and open-source app, that can be installed on top of a LN node.

LNbits acts as an interface between the user and a LN node, providing a simple, user-friendly way to manage and extend features for interacting with the payment network.

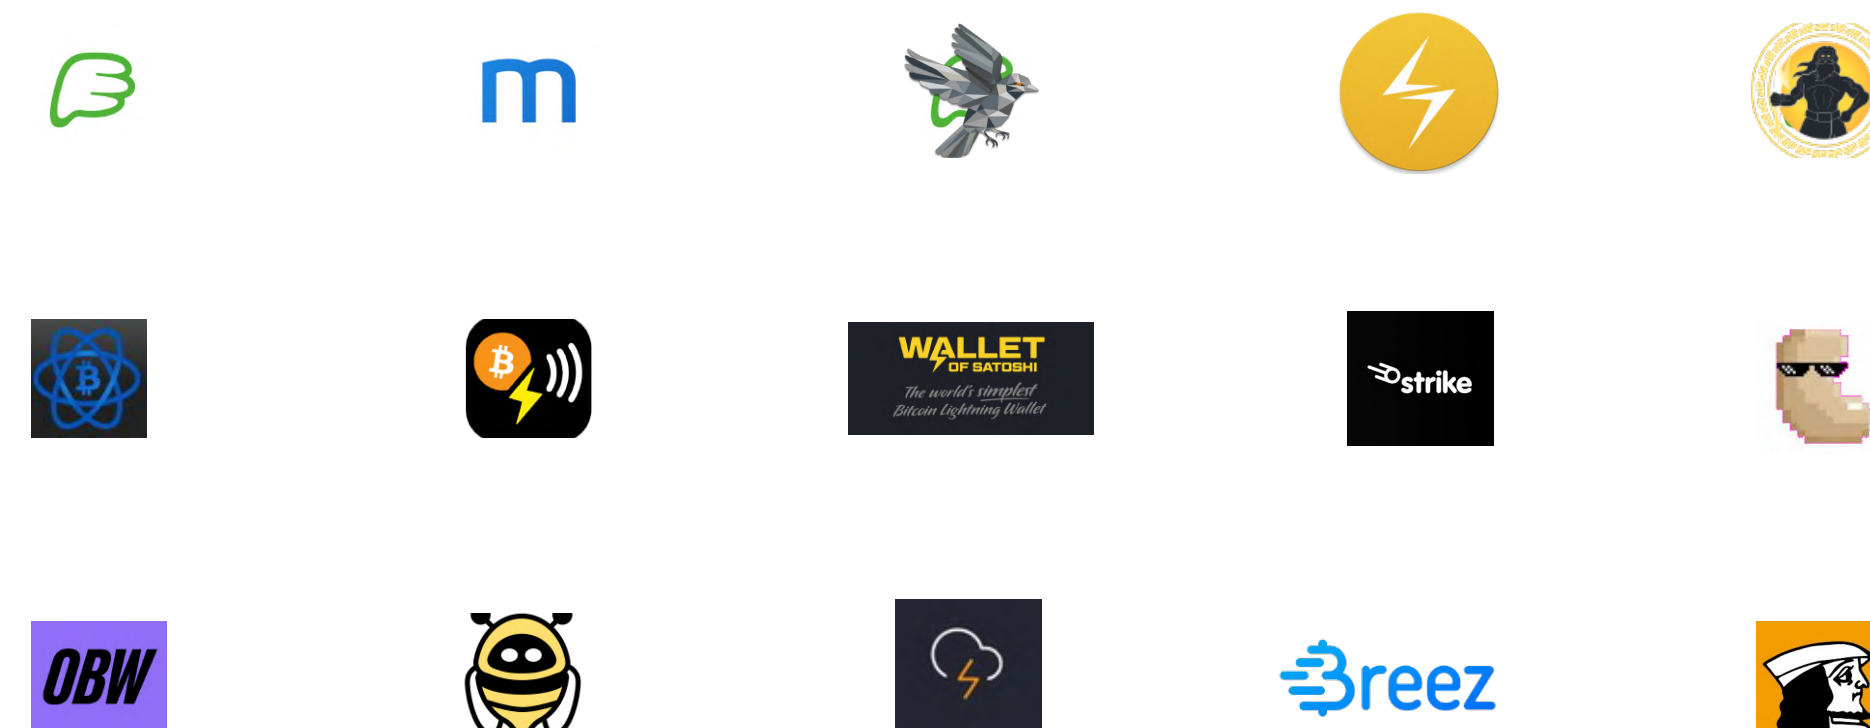

Demo server to play around and find out more about Lightning and LNbits

The LNbits wiki makes it easy to become a sovereign bitcoin merchant

LNbits is a powerful and reliable platform that's perfect for merchants looking to tap into the benefits of Bitcoin Lightning Network payments. So why not give it a try and join the growing community of businesses and developers who are leading the way towards a more free and decentralized financial future?

All major LN Wallets supported

 LNbits

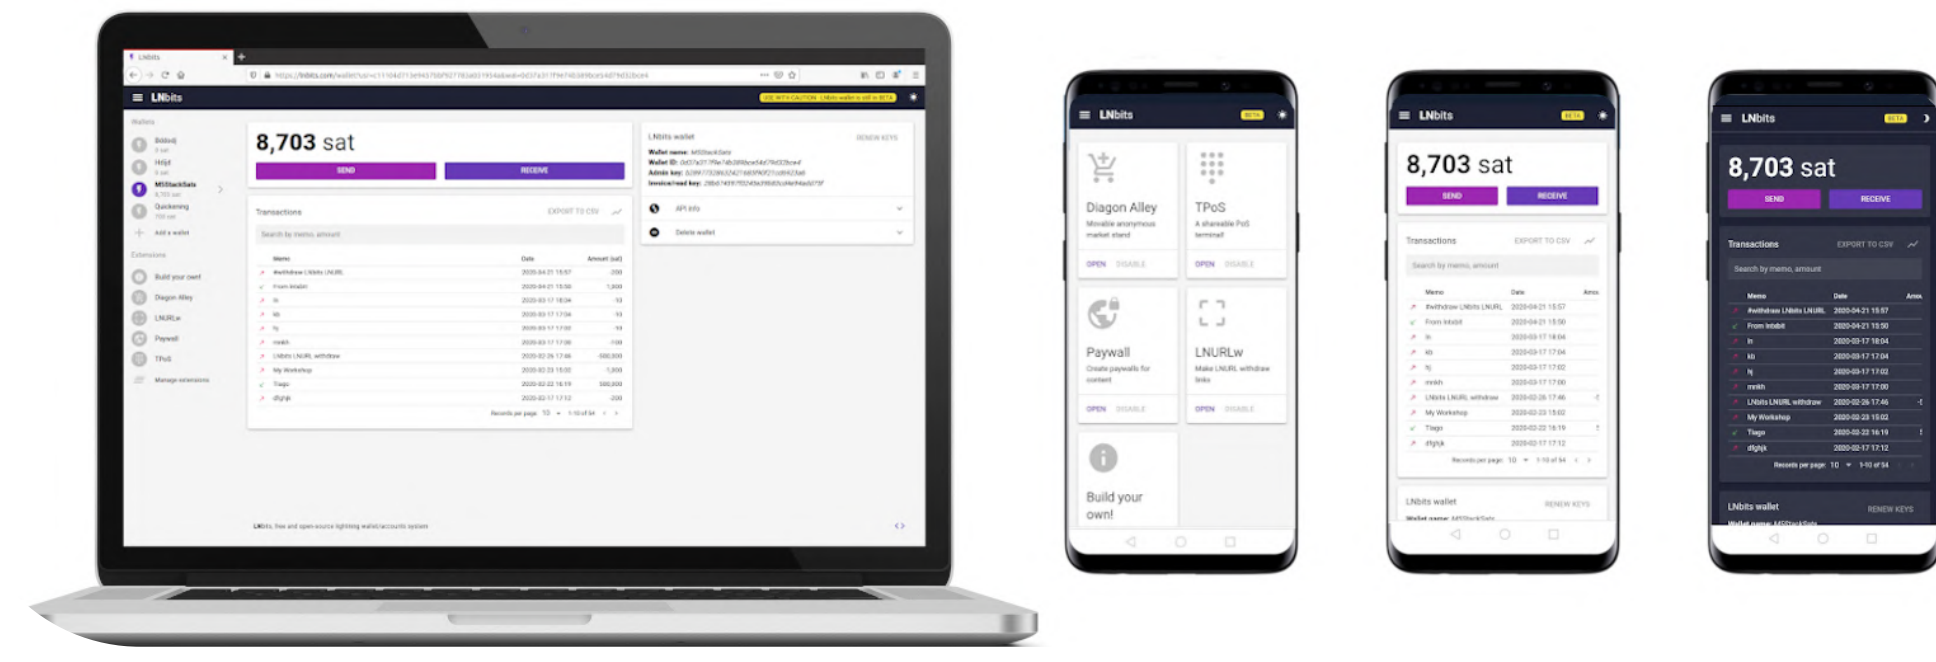

Payment Solution for shops & merchants

"Holy shit, look at the shit you can do with this LNbits, this is incredible" - Adam Curry

Bitcoin for webstores & shops

With LNbits you can customize your payment system to fit seamlessly into your business processes, all while keeping subscription models, those pesky fees and long waiting periods and fraud of traditional payment rails in check.

Our software comes packed with features like multi-user support, invoice management, customization and branding - perfect for merchants who want to take their payment game to the next level.

Be your own bank

At LNbits we understand that every merchant is unique and has different needs. That's why we've created a platform that offers more control and customization options. Here are just a few examples of how our platform can benefit different types of users:

- Wallet owners who use LNbits features for their funds management
- Online and offline merchants who want to accept Bitcoin onchain as well as LN payments.
- Developers who want to build Lightning Network applications.
- Node operators
- Builders of hardware tools

LNbits is built in a modular way, so you can customize it to your exact needs.

Interested in building ?

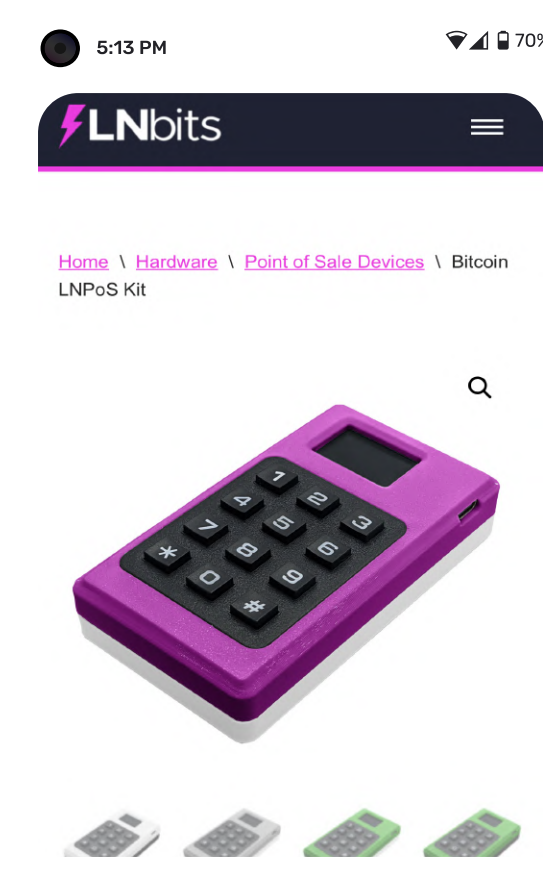

We are serious about our mission to promote financial sovereignty through Bitcoin Lightning Network payments. But that doesn't mean we can't have a little fun while we're at it! Our community is made up of professionals from all corners of the world who share our vision for a more decentralized financial system.

Whether you're a regular user, a software developer, networking expert, or just someone with a passion for 3D printing, we welcome you with open arms!

Not tech savvy ?

if you're worried about the technical side of things, don't be. Our cloud-based (SaaS) solutions eliminate the need to run your own node while still maintaining full custody of your funds. Also other cloud services like OpenNode, Luna and Voltage are available to provide you with a stable installation.

By installing LNbits in the cloud or connected to a simple Telegram bot, merchants can streamline their operations and focus on their core business.

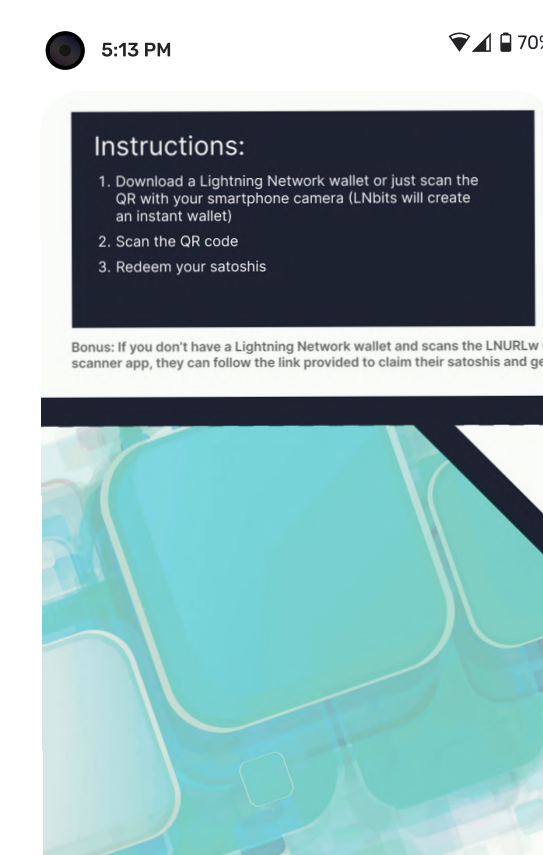

E-Commerce Payments

Integrate Bitcoin and Bitcoin Lightning payments into your e-commerce website easily using our WordPress plugin. Give your customers a seamless and secure payment experience. Our plugin provides a range of customization options, allowing you to tailor your payment to your specific needs and preferences.

Vouchers & Gift cards

Easily create custom vouchers that showcase your brand and capture your customers attention - whether as a printout or as an NFC card.

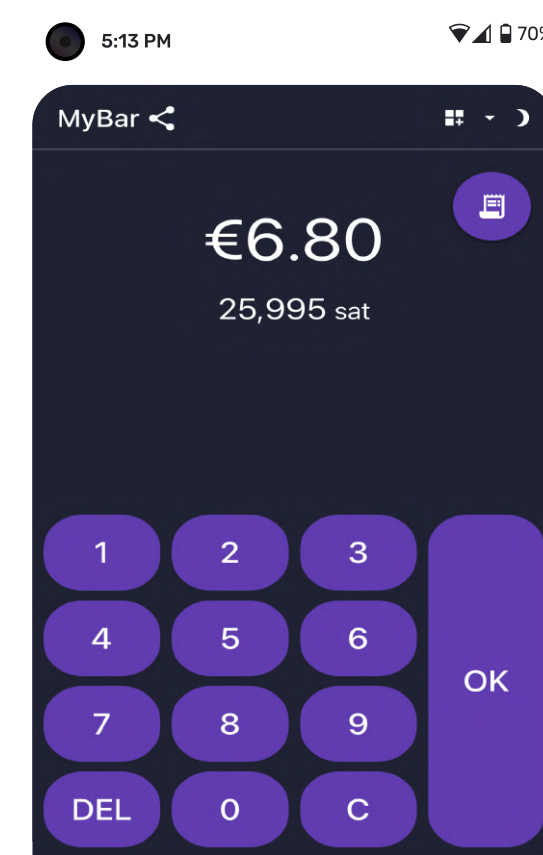

Vouchers can then be redeemed for payments in your store or in other stores, providing a unique and engaging way to promote your business and to drive sales.

Bitcoin in your bar or shop

If you're running a bar or coffee shop and need an easy way to collect payments from multiple waiters into your shop's wallet. With the TPoS keypad you can effortlessly manage payments and keep your finances organized.

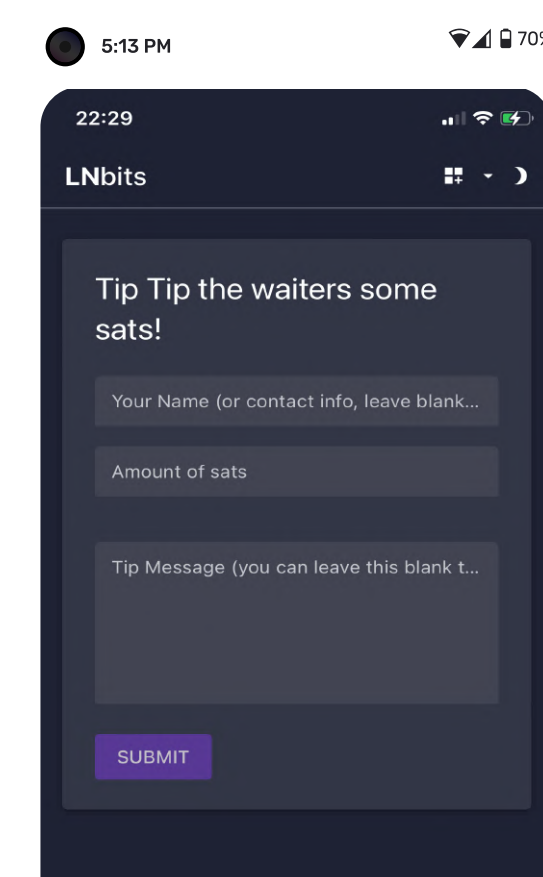

Present a QR code on your tables or counter that links directly to your LNbits shop. This is especially useful for ToGo-Products, allowing you to serve your customers on the go with ease.

Tipjars and Donations

If your business receives tips or donations, you can easily create a personalized webpage complete with a QR code for your customers to contribute to or offer the tipping function on the TPoS.

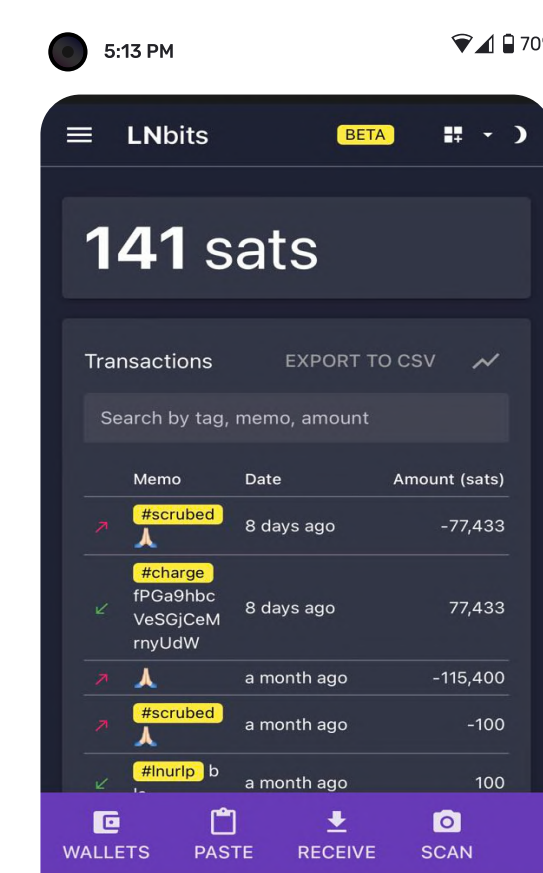

Automatically distribute tips among a group or at different rates for individual recipients.

Automated saving

The Scrub extension lets you forward incoming payments to another LN wallet automatically, e.g. to accumulate incomes from various sources to a certain wallet under your control.

The Boltz extension lets you exchange Lightning Bitcoin for onchain Bitcoin in an automated way.

Extensions

Tailor all LNbits accounts to your individual workflows and very unique products by using our extensions. You might know Plugins on Wordpress for your website, extensions work in a similar way - just for your bitcoin account. They offer a range of additional features such as automatic payment forwarding, timed payments and recurring billing.

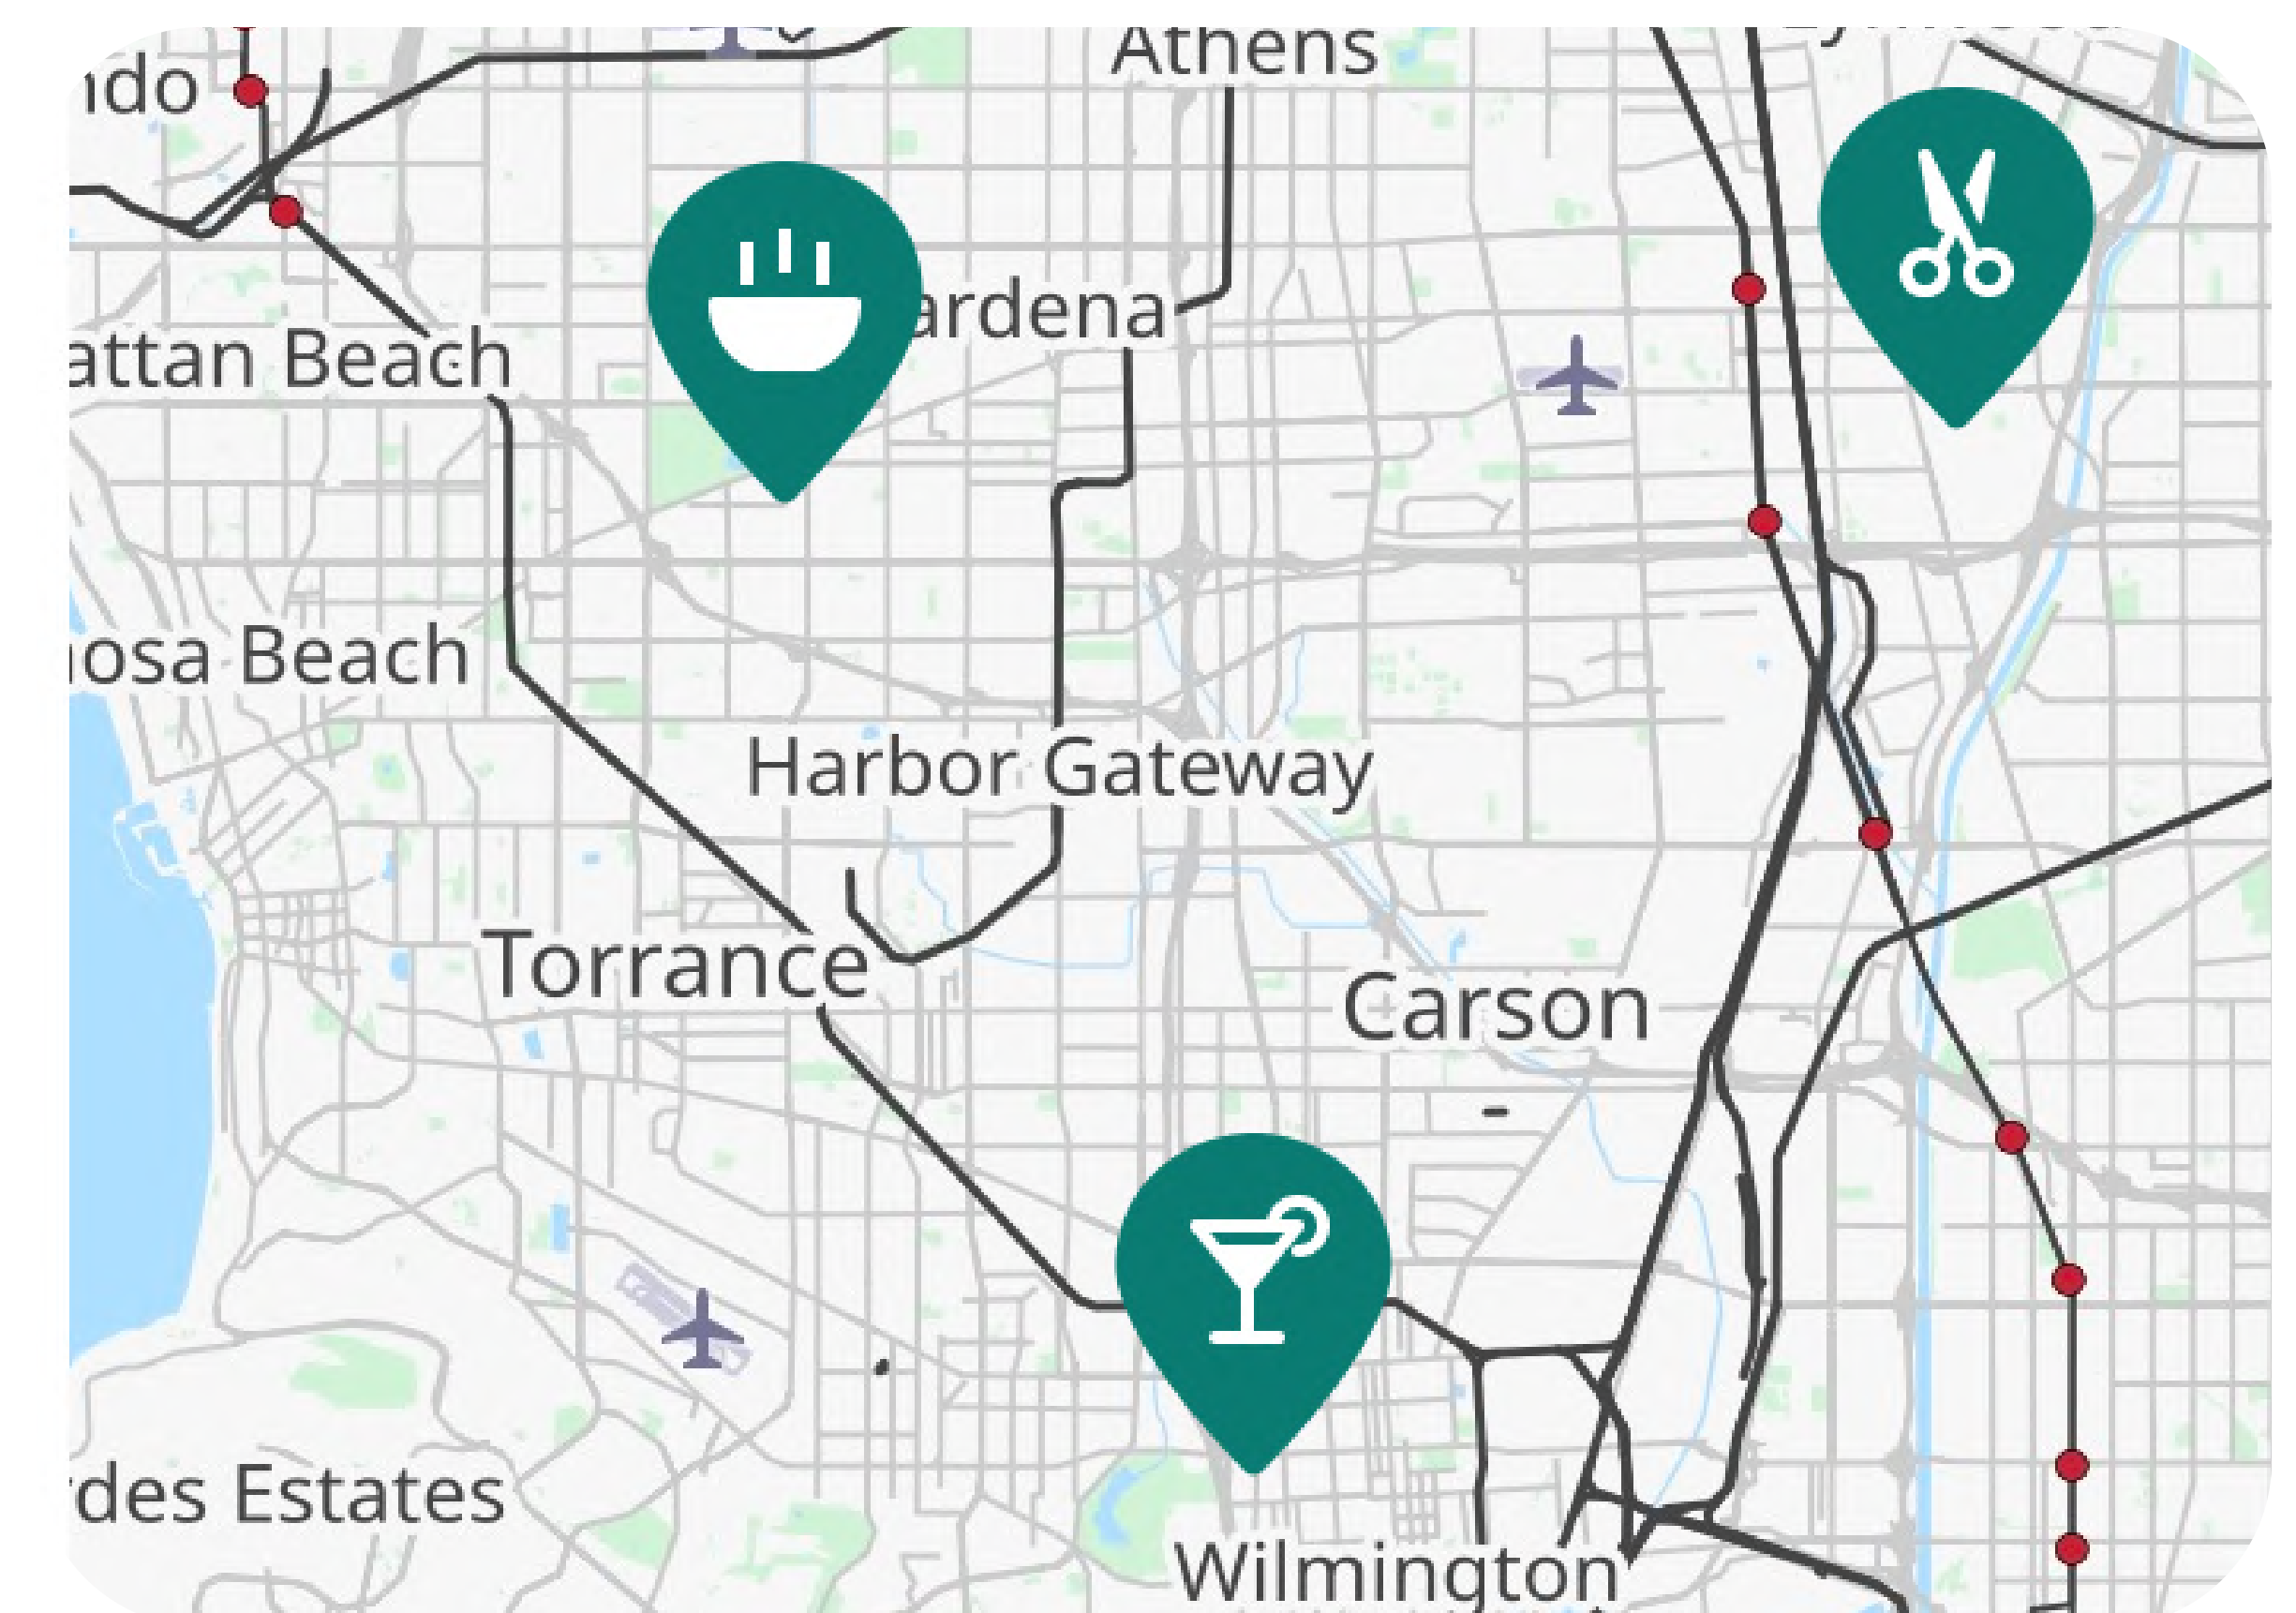

LNbits lets you combine all of those to streamline your payment processing in full sovereignty and provide your customers with a seamless and user-friendly payment experience.

Best of all, our platform is free, easy to use, free of inflation and open source ! Try this with your bank!

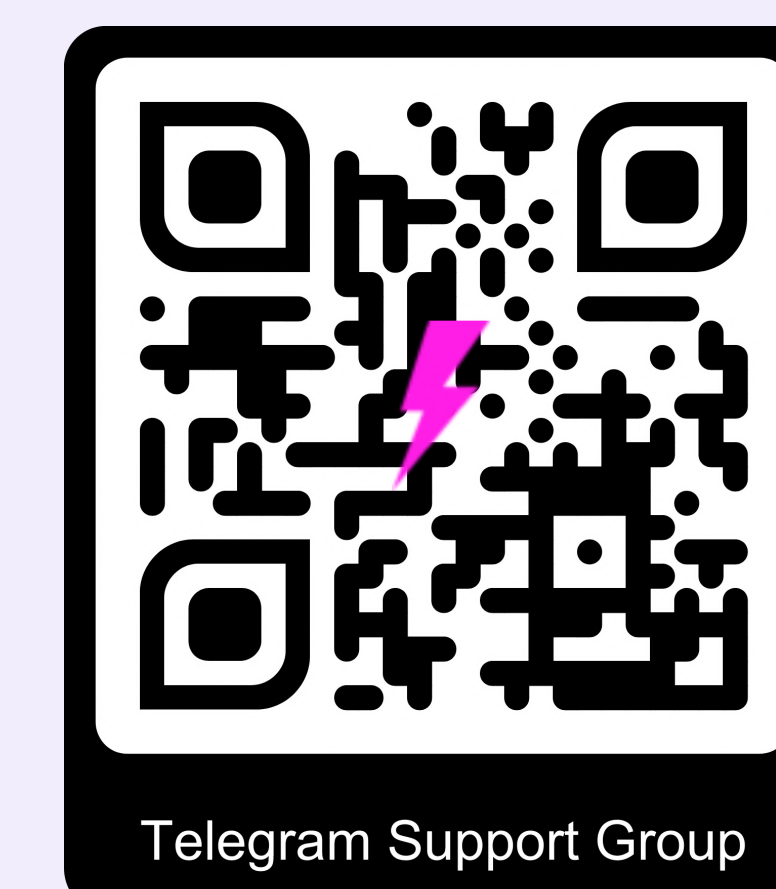

Mark yourself on BTCmap

BTCmap.org is based on open streetmap and gives each merchant in bitcoin a free option to become visible to others ! Mark your spot and experience new bitcoin customers popping into your store, too.
